

### ***MetricRetail is now Spirit International***

MetricRetail (Portland, OR), originally formed by a dedicated team of industry executives and managers as part of the Spirit International's retail design division, will now fall under the Spirit International branding.

Glenn Stewart, CEO of Spirit International, said, "Spirit International was built on the commitment to providing outstanding products and services as well as the industry's highest level of creativity. This move creates one multifunction creative group while reducing the duplication of services/supervision that leads to unnecessary costs. This will allow Spirit to be able to continue to offer their customers the absolute best VALUE in the industry".

Earlier this year, Metro Stores Fixtures (Dallas, TX) became a part of the Spirit International family of companies and will also be taking advantage of the combined resources and impressive industry history of Spirit. Stewart said, "While the industry has always been about change, the needs of our clients are expanding. It is critical that we not only continue to offer the industry's best products and services, but find better ways to offer more to our clients".

Spirit International is headquartered in Carrollton, TX and has always pushed to be an industry leader in offering their clients innovative and engaging solutions for over 16 years. Other Spirit International companies and services include: LED lighting tailored to retail settings, POP displays, jewelry, packaging, children's furniture, golf accessories and an offshore trading company. With over 1,500 employees, domestic and international, Spirit owns and operates its own manufacturing facilities, and maintains strong business relationships with multiple vendors crossing a wide range of capabilities.
